

14 - Dimmable LED

August 27, 2026 3:59 PM

$$\frac{y_2 - y_1}{x_2 - x_1} = \frac{255}{1023} = m$$

$$b = 0$$

$$\text{ledVal} = \frac{255}{1023} (\text{potVal})$$

Alternatively:

$$1023 \text{ pV} : 255 \text{ ledVal}$$

$$1 \text{ potVal} = \frac{255}{1023} \text{ ledVal}$$

$$y \text{ ledVal} = \cancel{x} \text{ potVals} = \frac{255}{1023} \cancel{x}$$

$$y \text{ ledVal} = \frac{255}{1023} \cancel{x}$$
